

Bivalent Fackeln

Main features of the bivalent flares

- ✓ Open and concealed burning
- ✓ Bio gas compressor optional
- ✓ Integrated pressure controller for biomethane optional
- ✓ Location or remote control

Optional

- ✓ Antifreeze package
- ✓ Tap-change operation
- ✓ Control of firing temperature

Bivalent flares

- Biogas volume flow 50-3000Nm³/h
- Biomethane volume flow 50-1000Nm³/h

Completion specifically to customer wish!

Biogas processing plants produce different gas qualities, which in each case must be flared off too.

The Bivalent-flare helps to save, because you get here along with only one flare. Also this tailored solution can be produced by us quickly and cost-efficient with prefabricated components in concealed or open burning for different requirements.
