

Special flares

← Flare system for 30.000 m³/h styrol steam incl. 13.000 litre propane gas tank with control station and 80kW emergency generator

↓ Propane pilot burner in operation

↑ Bivalent flare at Güstrow 12.000 m³/h biogas and 6.000 m³/h biomethane

Area of deployments include

- ✓ Wood gas
- ✓ Geothermic
- ✓ Syngas
- ✓ Pyrolysis gas
- ✓ Sewage gas
- ✓ Flash gases

Optional

- ✓ Heat value adaption with weak gases by admixture of natural gas or propane
- ✓ Heat extraction for emergencx heating
- ✓ Mobile flares for biogas plants

← Special model wall-mounted frame NTF300 for 300 m³/h biogas

↑ Flashgas flare for RAG - 50 m³/h flash gas Underground gas reservoir 7 FIELDS in Austria

← Wood gas flare for 700 m³/h wood gas in Italy

↑ Wood gas flare for research facility, Tirol, Austria

Foldaway wood gas flare for geothermic bore ↑ Germany

No gas is too hot for us: Technical innovations, test equipment, special requests - our technicians have long experience and are oriented towards your needs.

Different technical procedures and burning systems, including complete control and regulation technology are possible.

Mobile gas flares with integrated gas compressor and suction pressure monitoring are available.

We help you to save: With our special flares, you are able to flare also several gases with one plant! We are your partner for custom builds from planning to commissioning. .
